Levi - +447858 073946

John - +447592 634000

General

Chuggaboom bring our own vocal mics and necessary cables, and use our own IEM rig for monitors. We require no monitoring, we just need the drum kit mic'd straight to FOH, and we will give you every other channel you need, from our loom to your stage box.

If appropriate, we may use a stage riser (cable trunk) on stage.

Cabs

None. We use 3 kempers direct to FOH (split pre IEM rig).

Power requirements

2x 13amp for IEM/Kemper rack

1x 13amp for drummer

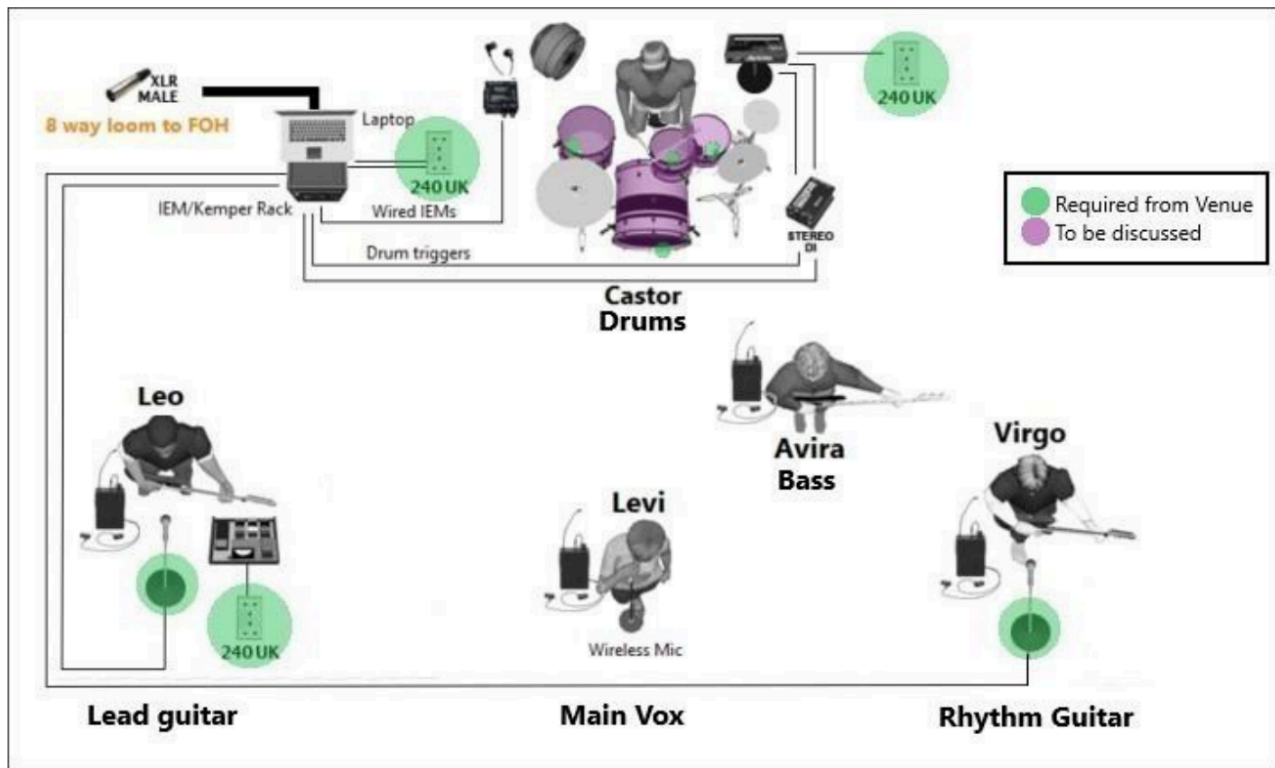

1x 13amp for stage left guitarist

3x13 amp for lighting package

Inputs from our loom to stagebox

1. Kick Trigger (XLR) Trigger Module
2. Bass (XLR) Kemper
3. Stage L Guitar (XLR) Kemper
4. Stage R Guitar (XLR) Kemper
5. Backing Track (Mono) (XLR) Laptop
6. Stage L Vox (XLR)
7. Levi Vox (Main Center) (XLR)
8. Stage R Guitar Double Channel

These 8 channels are labeled on the loom for you to patch however you wish. All inputs are unmixed direct from splitters.

Rider

- Plenty of water, preferably with caps that don't stay attached to the bottles
- A crate of beer
- A large packet of salty nuts
- Basic sandwich making supplies (dairy-free butter/spread if possible)

Other Requirements

Chuggaboom are a masked anonymous band, and as such require a private space to change. Please help us to maintain the band's anonymity.

We will need somewhere to park our van.

Many thanks!

Chugg
